SUMMARY

Full Stack Developer experienced in JavaScript based programming. My career as a Full-Stack Developer is driven by a passion for technology and a desire to innovate. I bring a unique perspective to the table, thanks to my diverse background. This blend of technical skills and creative problem-solving abilities makes me a versatile and effective team player. My professional journey includes a solid background in Full Stack development, Logistical and Property Management, where I successfully managed a company website for 3 years, a portfolio of 30 properties for eight years, and Logistical Management for 6 years.

TECHNICAL SKILLS

React, Redux, Typescript, Python, PSQL, Javascript, HTML, Css, Bootstrap, Node.Js, Word, Excel, Powerpoint

PERSONAL TECHNICAL PROJECT

Glasses -Github | Glasses

Glasses, is a full-stack ecommerce web app that allows users to search for and purchase spectacles. Users can log in, add to cart, change color of the product and make payment. Orders & users are stored on a database.

- The backend, built with Javascript, Express.js and Firebase, handles fetching, storing, and checkout of orders and customer details.
- The frontend, developed with Vite and React, displays the products and user interactions such as order selection and product checkout.
- Environment variables are configured for local development and production to ensure seamless communication and deployment. Render.com was used for deployment

EXPERIENCE

Full Stack Developer / Property Manager - www.hqmproperties.com   Cape Town, South Africa
HQM Properties   01/2016 - 2024
- Part of a team of 3 that designed, built and deployed the new & updated company website which branched into rentals and sales using HTML, CSS and Javascript.
- Implemented a dynamic content management system that allows easy updating of property listings, including adding high-resolution images, detailed descriptions, and virtual tours. Used technologies such as HTML, CSS, JavaScript, and a backend framework to ensure efficient data handling and display.
- Designed and developed an intuitive search and filtering system using JavaScript and backend integration with PSQL to enable users to search properties by location, price, type, and other attributes. Optimized the search algorithm to deliver fast and relevant results.
- Built and integrated user-friendly forms and API endpoints for client inquiries and property view scheduling. Ensured data security and seamless communication between users and agents through the implementation of secure form handling, validation, and backend processing using technologies like Node.js and Express.
- Managed all aspects of client properties with a portfolio of 30 properties.
- Marketed & rented houses & apartments on a management basis.
- I oversaw all renovations and home upgrades.

Logistics & Fleet Manager   Cape Town, South Africa
Patin Trading   06/2010 - 01/2016
- Managed all aspects of the company fleet of 13 vehicles.
- Built and maintained systems to monitor the daily progress of vehicle maintenance using Microsoft Office.
- Oversaw monthly stock takes.
